

## Andreas Kuehn

**Andreas Kuehn** is responsible for the development of **EWI's Global Cooperation in Cyberspace** programme groups on the **Internet of Things** and **Encryption Policy**. His expertise focuses on emerging information technology issues at the intersection of cybersecurity, digital policy and Internet governance. Before joining EWI, Andreas conducted research at Stanford University's Center for International Security and Cooperation. He was also an adjunct researcher at the RAND Corporation and worked in various public and private sector positions. Andreas Kuehn holds a Ph.D. in Information Science and Technology from Syracuse University and an M.Sc. in Information Systems from the University of Zurich.
