

Associate Experts from the Security and Defense Research Team

Unlike the other members of the Security and Defence Research Team - Intelligence, Criminality, Crisis, Cyberthreats (SDRT-I3C), the **Associate Experts** of the SDRT are **not necessarily coming from the academic world**. The title of Associate Expert is attributed to them on the basis of their **technical skills** and **professional background** (international organisations, large companies, national parliaments, etc.). Their contribution to the research work of the SDRT aims at bringing a **concrete perspective**, outside the academic considerations at stake, to the various lines of research of the SDRT. In this sense, the **operational vocation** of their work is never lost of sight.
